Junior Front End Developer

Atena (Afagh) Razmpoush | Vancouver, BC

Personal Statement

My priority as a Front-End Developer is to apply my programming skills to design the best possible solution for both clients and company. From my business and hospitality experiences, I bring the ability to communicate with customers and collaborate with coworkers. I love to share ideas, grow from feedback, and learn new skills.

Skills

- Languages: HTML5, CSS3, JavaScript, PHP, MySQL, Microsoft SQL Server
- Frameworks & Libraries: React, Bootstrap, Laravel, Angular, Vue, jQuery
- Tools & Open-sources: Figma, Photoshop, FileZilla, Git, Ubuntu
- Speaking English, Persian and Armenian
- Soft Skills: problem solving, quick learning, critical thinking, team playing, being a natural leader with excellent communication and negotiation skills

Canadian Work Experience

Freelance Zoom Moderator | Jan 2021 – Present | Vancouver, Canada

- Responded to participant technical problems as they arose

- Managed the polls and breakout room features

- Supported participants that were triggered by the training material

Fashion Associate in Plum & Caposhie Clothing Store | Mar 2019 - Feb 2020 | Vancouver, Canada

- Collaborated with more than 20 customers per day with a diversity of age range from 16 to over 70 years old

- Learned the core values of the company, the characteristics and fabrics of the products to confidently interact with customers and market our products

- Investigated customers' needs and the occasion they were shopping for, their appearance features and age to offer the best options in the store

Projects

To-Do-App | July 2021 - Present | https://github.com/atenajoon/ToDoApp.git

- A basic to-do-app created with React, Bootstrap and JSON Placeholder API. It fetched a list of to-do items from the backend and displays them in a card after the first render. It lets the user to filter the list, add a new item to the list, edit an existing item value and delete an item from the list.

Dental-App | July 2021 - Present | https://github.com/atenajoon/dental-app.git

- This is a project I am doing for a friend of mine who had a dental clinic. I have used Figma to design the UI, and React, Bootstrap, Sass, and React Strap to implement this project. The idea is having a responsive web application that allows the users to navigate through the pages to find their needed information, read and write google reviews in the Testimonial section, make a phone call or send booking appointment requests.

Vidly | July 2021 – Present | https://github.com/atenajoon/VidlyProject.git

- This is a project that is being made by following a tutorial from Mosh Hamedani and I did not do any single part of it on my own. It is being shared here to show the level of my knowledge and understanding of the main concepts, not my personal coding skills.

A SPA for Boulevard Dry Cleaners | Dec 2019 - Feb 2020

- This is my first paid project that I took right after my first course in BCIT. I assessed my client's needs, priorities and business goals to design and provide the content of the web application. WordPress, Elementor plugin, and some CSS was used to make this SPA

- I collaborated with a professional photographer to shoot the pictures at the work site, and chose the ones which could deliver the impression of "welcoming professional customer service".

Education

Associate Certificate of Applied Web Development
BCIT | Vancouver, Canada | Expected Graduation in Mar 2021

Master of International Economics
European University | Yerevan, Armenia | 2012 - 2014

Bachelor of Tourism & Hotel Management
Bonyad Applied-Science Education Center | Tehran, Iran | 2006 – 2011

Junior Front End Developer
